Reviews

A whole new eBook with a brand new point of view. It is definitely simplistic but shocks in the 50 percent of the publication. I am just pleased to explain how this is the greatest ebook i have read during my very own daily life and could be he best ebook for possibly.

Differentiating, partially with reference to r, the expression for T, we get $0 AueeiDauderssetzuug, Abth. I, . 1.28, gl. (69). t Auseinandersetzung, Abth. I, s . 128, 129, gl. (70), (71). Auseinandersetzung, Abth. I, s 130, gl. (72). Lastly, we have $G=V-T$ In all these equations A and denote the same multipliers as appear in T. In these expressions four functions of the co-ordinates are present which did not appear in the determination of the first-order terms. For Jupiter we have t (a V J, given at pages 53-56, by this factor, and the product again by three-fourths of this factor, and thus obtain In order to form the expressions for the forces in the second-order terms need developments for the two quantities We are now able to get the four functions severally for Jupiter and Saturn, the remaining data required being found in Chapters I and II. Before we can write the expressions for the first eight factors of ST we have to pass through the intermediate stage of deriving V, X, and T. It will be seen that in all cases, except that of X, the factors involving y are the factors A and B, whose expressions have been given at pages 73, 74. In the case of X, putting $X = Ma j + Nar-j-dg T dr$ we have $2T0 M = i--T--cos (/--a) N = V \sin /cos -o--(cos/4 e) \sin tal a-cos2...$$
