Fire Administration, National Fire Data Center, 1990 OCLC Number: (OCoLC)77118396 Subject: Fire investigation -- Case studies. Excerpt: . . . USFA-TR-034 October 1989 5 A relay system was utilized to remove people from the second floor. Firefighters wearing breath-ing apparatus took patients from their rooms to the stairwell, where they were transferred to other personnel who carried them to the outside. By this time, the medical director for the Paramedic Rescue Squad and a Norfolk General Hospital physician arrived and established a triage site on the lawn near the east end of the building. Rescue was continuing. Firefighters were experiencing difficulty releasing restrained patients from beds, as the restraining devices had to be cut or untied, requiring additional time. Difficulty was also experienced when removing life support systems and body fluid tubes, which were connected to bed and patient. Because it took so long to remove the bed straps and to disconnect patients from medical equipment, and because rescuers had to move cautiously down the stairwell carrying elderly, infirm patients, a traffic jam developed in...
