### ***Reviews***

*This type of publication is every thing and helped me seeking ahead and much more. It usually fails to charge too much. It is extremely difficult to leave it before concluding, once you begin to read the book.*

Excerpt: . vii. fevebs with masked local manifestations. Rheumatic Fever--Pneumonia--Cerebro-Spinal Fever--Diphtheria--Bubonic or Oriental Plague. The temperature range, if we except pneumonia, does not conform to a type, nor does defervescence occur on definite days. Fever is, it is true, a controlling symptom, but the evidences of local mischief are conspicuous and characteristic. This group includes Rheumatic Fever. Pneumonia. Cerebro-Spinal Fever. Diphtheria. The Bubonic or Oriental Plague. rheumatic fever. Definition.--Eheumatic fever is a non-contagious, constitutional, febrile disease, characterized by acute inflammation of the joints, occurring irregularly and terminating without suppuration; inflammation of the heart is of very frequent occurrence. The disease does not run a definite course either in its duration or in the sequence of the symptoms; it depends upon constitutional peculiarities, either inherited or acquired, and is not self-protective. On the contrary, the very fact white meat of fowl, and game in small quantities may be permitted. For lingering joint-pains massage and galvanism are useful. The occurrence of hyperpyrexia demands the prompt and energetic use of the cold bath. If this measure cannot be employed, cold may be applied by means of ice, cold affusions, ice-bags, wet compresses, and injections of iced-water. Every effort must be made to keep the temperature below 105 F. Chest complications will not preclude active antipyretic measures. Alcohol may be required to counteract the flagging tendencies of the circulation. When the temperature falls under the influence of external cold, the thermometer must be used every hour. When the temperature...
