# The First Humans

By John G Fleagle

Springer Jun 2009, 2009. Buch. Book Condition: Neu. 279x210x20 mm. Neuware - There are some issues in human paleontology that seem to be timeless. Most deal with the origin and early evolution of our own genus - something about which we should care. Some of these issues pertain to taxonomy and systematics. How many species of Homo were there in the Pliocene and Pleistocene How do we identify the earliest members the genus Homo If there is more than one Plio-Pleistocene species, how do they relate to one another, and where and when did they evolve Other issues relate to questions about body size, proportions and the functional adaptations of the locomotor skeleton. When did the human postcranial 'Bauplan' evolve, and for what reasons What behaviors (and what behavioral limitations) can be inferred from the postcranial bones that have been attributed to Homo habilis and Homo erectus Still other issues relate to growth, development and life history strategies, and the biological and archeological evidence for diet and behavior in early Homo. It is often argued that dietary change played an important role in the origin and early evolution of our genus, with stone tools opening up scavenging and hunting opportunities...
